## PRESIDENT'S REPORT TO STOCKHOLDERS AND EMPLOYEES

Our fiscal year which ended May 3, 1950 marks another stage in the transition of our companies at home and abroad from the war-time economy to normal operations.

Each year, our operations are influenced by many conflicting factors. In the past twelve months, the most outstanding and unusual event was a nearly world-wide devaluation of currencies. Of primary importance to us was the effect of devaluation in Canada, England, and Australia. While these devaluations did not affect specifically or immediately the volume of sales or profits of our subsidiary companies in terms of their own currencies they did reduce the number of U. S. dollars which we received as dividends from these countries. Devaluation reduced the value of their net current assets, sales and earnings included in our consolidated statements.

Their net current assets (after deducting all liabilities) were reduced \$3,250,000. This was charged to a reserve for contingencies which had been established over the past twelve years to meet such a situation. This reserve still has a balance of \$5,000,000 as further protection against possible future unusual losses.

### SALES

Consolidated sales for the past year totaled \$170,508,252, which has been exceeded only once in the company's history, and our tonnage was at an all-time high.

Sales in the United States were \$121,792,741, or \$4,353,759 below the previous year. This reflected the discontinuance of certain unprofitable products, price decreases made in some of our important product lines, and minor changes of volume or price in other varieties.

Sales by subsidiaries in Canada, England and Australia continued to expand satisfactorily, and attained new peaks. Total sales of these subsidi-

aries amounted to \$48,715,511, after giving effect to devaluation. Had there been no devaluation, sales of subsidiaries would have been about \$57,000,000.

### NET INCOME

Net income amounted to \$4,364,017, compared with \$6,451,048 for the previous year. The decrease reflects a combination of factors experienced during the year. As described above, the devaluation of foreign currencies decreased the dollar equivalents of the earnings of subsidiaries. Expenses rose with the establishment of new managerial functions in the Sales Division. Rearrangement of facilities in Pittsburgh in preparation for the construction program called for non-recurring expenses. Interest was paid throughout the year on the U. S. borrowings of \$15,000,000, although we will not obtain major benefits from this program until construction is nearly complete. Higher wage and salary rates became effective at various dates throughout the year. We took full, but proper, advantage of a change in the Canadian tax law which permitted us to enter larger amounts of depreciation, thus reducing in the current year our reported net earnings; the advantage to the company is that our income tax is reduced proportionately.

### DIVIDENDS

During the year, dividends were declared and paid quarterly. These totaled \$3.65 per share on Preferred Stock and \$1.80 per share on Common Stock, as in the previous two years. This represented 66% of the consolidated net income for the year. The balance was retained by the company to help meet the need for increased funds required by the growing business in the subsidiary companies, and to handle the major improvement of our properties and facilities.

## FACILITIES

New or enlarged sales warehouses have been leased at Columbus, Ohio; Indianapolis, Indiana; Hartford, Connecticut and Milwaukee, Wisconsin. These replace less adequate or inefficient older quarters and will permit us to give better service to our customers in these localities.

The year has seen striking progress in the plan of modernization of our factory facilities in Pittsburgh. As this is being written, the structural steel work is nearly completed in the building which will house our employees' service and factory administration facilities; the site has been cleared of old factory buildings and old houses and piling is being driven for the erection of a building for the production of vinegar; and further steps have been taken to improve our can-making and power plant facilities. We have acquired all of the property needed for completion of the program. City Council has cooperated in the efficient lay-out of our new buildings by closing to the public certain streets and alleys, which we have now purchased and over which buildings and manufacturing conveyors will be constructed.

The entire program is moving along substantially in harmony with the schedule originally outlined, and you will be glad to learn that contracts let to date closely correspond with the costs estimated when our financing arrangements were made a year ago.

The British subsidiary continued its program of converting the former munitions factory at Stanshield, Lancashire, to an efficient modern food processing establishment. Prior to the war, our Leamington, Canada, factory supplied the large British demand for Heinz Tomato Ketchup. Foreign exchange restrictions have deprived us of this business ever since 1939. We are particularly gratified that technological improvements now permit us to make in England, from tomatoes grown on the Continent, Heinz Tomato Ketchup of the high standard known throughout the world.

During and since the war, our Australian organization has operated for the Government a factory in Devonport, Tasmania. Under a new agreement with the Tasmanian Government this

facility is now being operated as a Heinz branch factory. The Tasmanian Government is cooperating in plans for increasing its output and broadening the variety of Heinz products.

## INVENTORIES

Our investment in inventories was reduced from \$61,400,000 a year ago to \$54,900,000 on May 3, 1950. This reduction of \$6,500,000 or 10.6% in inventories resulted from closer control over processing and inventory and from some reduction in prices of ingredients used in making our products. Inventories in the United States decreased about 13%.

## FINANCING

Within the past year, financing of important expansion has been completed by our Canadian Company. The sum of \$2,500,000 (Canadian) has been borrowed at an interest rate of 3.25%, with repayment of principal scheduled over a ten-year period. This supplements arrangements reported last year for raising long-term funds in the United States, in England and in Australia.

In the four post-war years, we have retained for plant modernization and general expansion \$14,300,000, or over 55% of our \$25,500,000 earnings. Long-term borrowings plus new capital obtained from sales of Common and Preferred Stock of the parent company and of the English subsidiary have been used to finance additional inventory and accounts receivable (required by an increase in sales) and to modernize and expand factory and sales warehouse facilities.

## ORGANIZATION AND MANAGEMENT

In October, 1949, Mr. A. L. Schiel retired as Executive Vice President and member of the Executive Committee. Mr. H. N. Riley became Executive Vice President, and the vacancy on the Executive Committee was filled by the appointment of Mr. Frank Armour, Jr., Vice President and General Manager of Sales and Distribution.

Our executive development policy provides for visits between executives of the parent organization and the various subsidiaries. Directors and other executives of the British, Canadian and

Australian companies visited the Home Office in Pittsburgh, as well as American factories and Sales Branches, to keep abreast of management techniques. Several directors of the parent company have visited the foreign subsidiaries to consult with their directors and executives on local programs and operations. By such an exchange of visits, the experience of our world-wide organization is closely knit and our objectives of improvement in organization and management techniques are implemented.

#### FEDERAL INCOME TAXES

Federal Income Tax Returns for the years ended April 30, 1946, 1947 and 1948 have been examined by the Government but we have not agreed to the additional amounts claimed by the Government. The amounts under discussion are not major.

Under Section 722 of the Internal Revenue Act, a claim has been filed by the company for a refund of taxes due to a claimed adjustment of the excess profits tax base. The claim is based on the rapid development of the baby food industry during the base years. There is no present basis for estimating accurately the refund, if any, that will be made by the Government.

#### FISCAL CALENDAR

Our fiscal calendar has been changed to close this year on Wednesday, May 3, 1950, rather than the April 30th date that has heretofore been used. Our fiscal calendar is now divided into four quarters of thirteen weeks each, with each week, each quarter and each fiscal year ending on Wednesday evening. Control reports of operations will thus reach Pittsburgh, from all points in the United States, early each Monday morning. Statements of sales and earnings hereafter published will be on the basis of the fiscal calendar, rather than the use of the conventional calendar months.

In order to have the declaration of dividends on Common Stock reflect the Directors' consideration of current operating results, the date for payment of Common Stock dividends was changed from the first to the tenth day in each calendar quarter. The first payment of Common Stock

dividends on this schedule was made on April 10, 1950. Dividends on the Preferred Stock continue to be paid on the first day of each calendar quarter in accordance with the terms of the issue.

#### OUTLOOK

The Australian economy is enjoying the benefits of industrial expansion, full employment and some inflation. A policy of immigration supported by both of the major political parties is expected to swell the population of the Commonwealth so that an increase of one-third during the next seven or eight years is anticipated. In October, 1949, restrictions on the use of tinplate were terminated. The elimination of these restrictions has enabled the Australian subsidiary to re-introduce a number of Heinz products which we have been unable to sell there for several years.

The limited availability of tinplate in Great Britain continues to create an overall ceiling on the production of canned foods. Some ingredients, notably sugar, continue to remain in short supply. Nevertheless, our British subsidiary was able to strengthen further its position in the British market and to increase its sales to a new record level.

The Canadian economy is operating at a high level. We expect our business for the coming year to exceed the fiscal year just closed.

In the United States we anticipate a modest increase in sales volume during the coming year. We should benefit from general economic conditions which indicate a continuance of a high level of business activity unless upset by international events. Crop conditions are promising and we expect to obtain our raw material requirements at reasonable prices. Our relations and reputation with independent and chain store operators, as well as with our hotel and restaurant customers, are good. Our merchandising programs are effective.

The management of all of our companies is experienced and competent. The improvement of facilities which is now under way will increase our operating efficiency. Under these circumstances, I am confident that our business will continue to progress.

**504 GRANT BUILDING**

**PITTSBURGH 19, PA.**

June 15, 1950

Board of Directors,  
H. J. Heinz Company,  
Pittsburgh 30, Pennsylvania.

We have examined the balance sheets of H. J. Heinz Company and of its Canadian subsidiary as of May 3, 1950, and the related statements of income and surplus for the fiscal year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Independent chartered accountants have examined the financial statements of the English subsidiary for the same period and we have been furnished with the report covering such examination. Although unaudited accounts of the Australian subsidiary as of May 3, 1950, have been used in the preparation of the consolidated financial statements, we have been furnished with the report of their independent chartered accountants as at October 31, 1949, the close of the fiscal year of that subsidiary. The net assets, net sales, and net income of the Australian subsidiary amounted to less than 5% of the related consolidated figures.

The accounting policies followed by the Company were consistent with those of the preceding year except with respect to depreciation practices of the Canadian subsidiary. It has been that subsidiary's consistent policy in the past to depreciate fixed assets on a straight-line basis. During the year ended May 3, 1950, as a result of changes in Canadian tax law, the Canadian subsidiary adopted, with our approval, the diminishing-balance method of depreciating fixed assets, the effect of which was to increase depreciation for the year by \$320,775.

In our opinion, based upon the examinations made by us and relying upon the previously mentioned reports of independent chartered accountants with respect to the financial statements of the subsidiary companies in England and Australia, the accompanying balance sheet and statements of income and surplus present fairly the consolidated financial position of H. J. Heinz Company and its subsidiary companies at May 3, 1950, and the consolidated results of their operations for the fiscal year then ended, in accordance with generally accepted accounting principles.

**H. J. HEINZ COMPANY**  
AND CONSOLIDATED SUBSIDIARY COMPANIES

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(1) *Principles of consolidation:* In the preparation of the consolidated balance sheet, and the related statements of consolidated income and surplus, all subsidiary companies have been consolidated, with the exception of the Spanish subsidiary which has been excluded because of uncertain foreign exchange conditions.

Consolidated assets less liabilities at May 3, 1950, were located as follows:

	Total	United States	Canada	England	Australia
Current assets.....	\$93,056,237	\$68,182,291	\$8,931,993	\$13,184,524	\$2,757,429
Current liabilities.....	17,280,338	8,759,854	2,111,996	6,027,011	381,477
Net current assets.....	\$75,775,899	\$59,422,437	\$6,819,997	\$ 7,157,513	\$2,375,952
Other assets, less other liabilities.....	12,009,997	7,328,550	2,659,413	1,413,868	608,166
Consolidated net assets.....	<u>\$87,785,896</u>	<u>\$66,750,987</u>	<u>\$9,479,410</u>	<u>\$ 8,571,381</u>	<u>\$2,984,118</u>

All assets, except fixed assets, and all liabilities of the foreign subsidiaries have been translated from foreign currencies at official rates of exchange prevailing at the end of the fiscal year; fixed assets have been stated at their approximate United States dollar equivalent at the time of acquisition. There are currency restrictions in the countries in which the foreign subsidiaries operate which restrict the realization of foreign assets into U. S. dollars.

Operating accounts of the foreign subsidiaries have been converted into United States dollars at a weighted average of the official exchange rates in effect during the year. Consolidated net sales and net income for the fiscal years ended May 3, 1950, and April 30, 1949, are summarized as follows:

	Fiscal Year Ended	
	May 3, 1950	April 30, 1949
<b>Net sales:</b>		
United States.....	\$121,792,741	\$126,146,500
Foreign subsidiaries consolidated.....	48,715,511	48,731,223
Total.....	<u>\$170,508,252</u>	<u>\$174,877,723</u>
<b>Net income:</b>		
United States.....	\$ 2,621,647	\$ 3,663,288
Foreign subsidiaries consolidated.....	1,742,370	2,787,760
Total.....	<u>\$ 4,364,017</u>	<u>\$ 6,451,048</u>

During the fiscal year ended May 3, 1950, dividends amounting to \$1,366,499 were received in the United States from the consolidated foreign subsidiaries as compared to \$1,442,456 in the previous fiscal year.

**H. J. HEINZ COMPANY**  
**AND CONSOLIDATED SUBSIDIARY COMPANIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(2) *Inventories:* Inventories are classified as follows:

	<u>Total</u>	<u>United States</u>	<u>Foreign Subsidiaries Consolidated</u>
Finished goods.....	\$33,525,885	\$22,151,928	\$11,373,957
Work in process.....	4,152,343	3,088,557	1,063,786
Materials and supplies.....	17,209,981	9,659,440	7,550,541
<b>Total.....</b>	<b>\$54,888,209</b>	<b>\$34,899,925</b>	<b>\$19,988,284</b>

(3) *Retirement systems:* Under employees' retirement systems, the companies have made payments or accruals aggregating \$10,898,153 for prior and current service costs as of May 3, 1950. The balance of the actuarial estimate for prior service costs, which was neither funded nor accrued on May 3, 1950, amounted to \$1,538,522.

(4) *Cumulative preferred stock:* The 3.65% cumulative preferred stock is redeemable on or before October 1, 1951, at a price of \$107.75 per share for optional redemption, or at a maximum price of \$105.25 if redeemed through the sinking fund, and at decreasing prices thereafter. The annual payment of \$200,000 was made to the sinking fund for the purchase and redemption of the 3.65% cumulative preferred stock on October 1, 1949.

(5) *Earned surplus:* Under the provisions of the 2.90% promissory notes, the portion of the consolidated earned surplus which is unrestricted as to the payment of dividends on the common stock is not less than \$4,978,344.

(6) *Depreciation:* Depreciation of \$2,531,014 was provided in the accounts for the fiscal year ended May 3, 1950, and \$2,182,230 was provided for the prior fiscal year.

(7) *Management profit-sharing plan:* In addition to the current year's provision of an accrued liability of \$198,354 in respect of the management profit-sharing plan, selling, general, and administrative expenses include \$329,611 representing payments to participants, making the total charge to profit and loss in respect of the plan \$527,965 for the year ended May 3, 1950, compared to a total of \$950,321 for the preceding year.

(8) *Reserve for contingencies:* A civil suit for damages has been brought against the Company and one of its suppliers. If fully successful, this suit would result in liability of approximately \$1,500,000. The Company believes that it will be able to defend successfully this suit. The final decision may not be known for many months or perhaps several years.

(9) *Fixed asset commitments:* Under the modernization plan for the Company's factory in Pittsburgh, the Company is obligated under open contracts and purchase orders in the aggregate amount of approximately \$6,000,000, of which \$2,000,000 has been disbursed.
